

# Flood Risk Map: Strafford County, New Hampshire

## MAP SYMBOLOGY

| Base Data                            | Flood Data   | Flood Risk | Areas of Mitigation Interest   |
|--------------------------------------|--------------|------------|--|
| Corporate Limits                     | Restudy Area | Very Low   | Accredited Levees  |
| Major Roads                          | New SFHA     | Low        | Non-Accredited Levees  |
| Interstates/US Highways/State Routes |              | Medium     | Dams   |
| Watershed Boundary                   |              | High       | Coastal Structures   |
| State Boundary                       |              | Very High  | Stream Flow Constrictions  |
|                                      |              |            | Past Claims Hot Spot   |
|                                      |              |            | Key Emergency Routes   |
|                                      |              |            | Overtopped During Frequent Flooding Events   |
|                                      |              |            | At-Risk Essential Facilities   |
|                                      |              |            | Individual Assistance (IA) & Public Assistance (PA) Data                           |
|                                      |              |            | Significant Land Use Changes (within the past 5 years and looking forward 5 years) |
|                                      |              |            | Areas of Significant Riverine or Coastal Erosion                                   |
|                                      |              |            | Non-Levee Embankments  |
|                                      |              |            | Other Flood Risk Areas   |
|                                      |              |            | Areas of Mitigation Success  |
|                                      |              |            | Other  |
