Concord, NH 03301-3809

Re: Photo Based Floodplain Mapping
DR 1144-0011

Dear John:

The Photo Based Floodplain Mapping project DR 1144-0011, or at least that portion funded under the Hazard Mitigation Grant Program, is now completed as the attached Quarterly Report indicates. By the end of January, my office will provide you back-up final information. This information would have been submitted earlier but there are some programmatic issues that we are still sorting out. Your predecessor, Grace, had approved rolling your project into a much larger Town and FEMA funded effort. This reflects a discovery we made early on in the project, that the funds provided under the State Hazards Mitigation Grant were insufficient (although essential) in accomplishing our goals. That decision to roll those funds into this program now requires us to go back three years into financial records that are no longer in our computer system to extract expenditures to assign to this grant.

Because the Town has to date expended approximately \$210,000 in cash outlays on this project plus approximately 200 hours of my time, we will have no trouble in demonstrating the appropriate local match. As you know, our FEMA funded Project Impact will conclude on December 31st and will officially close out at the end of March. We already have excellent photo-based flood maps and will be spending the necessary months verifying their accuracy and completing the project.

On behalf of the Town of Peterborough, I express my gratitude to NHOEM for providing the money that has made this project possible. By January we will be submitting not only close-out financial information, but will also provide you with hard copy samples of what we have achieved. Attached is one sample for your files.

Sincerely,

Peter C. Ryner
Director
