|--|--|--|

Critical facilities, dams, bridges and evacuation routes were provided by the Town of Rye, with assistance from the New Hampshire Department of Transportation for bridges and the New Hampshire Department of Environmental Services for dams. Information was gathered to accompany the development and subsequent update of the Hazard Mitigation Plan under the guidance and funding of the New Hampshire Office of Emergency Management and the Rockingham Planning Commission, 2004 and 2009.

Base data (town boundaries, hydrography, roads and railroads) are taken from the USGS digital Line Graph data, 1:24,000 and 1:100,000, as archived in the GRANIT database, at Complex Systems Research Center, Institute for the Study of Earth, Oceans and Space, University of New Hampshire, Durham NH, 1992-1999. Roads have been updated from work done by the Rockingham Planning Commission and the NH DOT. Partial updates have been completed through 2000.
